

MoM-

Time- 4.00 pm

Attendees- Ananth, Eppa, Smitali, Taarun

Summary-

Taarun explained his encoder code and went through the understanding of Turbo decoder. We discussed and concluded that it is not feasible to code decoder from scratch even in a week's time and decided to consult PLs. Also as Eppa does not know python, he has discussed with Pratyaksh and will be understanding others' codes.

After the meeting and consulting Achintya it was decided that

Turbo code using libraries- Taarun

Product code- Smitali

Convolutional code (Non systematic)- Ananth

Understanding a pre existing full fledged implementation and make a detailed explanatory report of it - Eppa
